lots are sub-divisions of that high and commanding region, well known as the "Magazine Field"

These lots afford as fine situations for private residences as can be found in the State of South Carolina. They are higher than any other part of our incorporate limits, and command a prospect not only of the village, but of the surrounding country. The region is in other respects very desirable. The range of lots occupying the crest of Magazine Hill is about equi-distant from the public Square, and the depot of the Greenville and Columbia rail road, and quite near enough to either for comfort and business.

These Lots each contain about One acre and a half, and all are corner lots, having a side and end fronting upon very broad streets, which appear in the plan of the village, filed in the Clerk's office.

These lots can be purchased, on fair terms, and on a credit if desired, by applying to either of the undersigned, who will take pleasure at any time in showing the premises, to persons desirous of purchasing
